

# Has your child been referred for behavior problems or ADHD?

## What is the Family Care Study??

This study is being done to learn what matters most to caregivers about treatment for their child's ADHD.

---

### Who can join the study?

1. Parent or primary caregiver of a child who is receiving care for ADHD.
2. Your child is 4-14 years old.

### What you must do

If you join the Family Care Study:

1. Sign the form saying it is OK for the research staff to call you about the Family Care Study.
2. Sign a form saying that you want to be part of this study.
3. Complete 2 surveys (30 minutes each) + 2 follow-up phone calls (15 minutes each).
4. Sign a form to let the research staff get your child's pharmacy records.
5. Get \$25 for being in our study.

### Does this study help you?

This may not help you now, but it may help the care of children in the future. You may find it helpful to know your input is being used to help children.

### What we will not do:

If you join the Family Care Study:

1. We will **NOT** let anyone but the research staff (not even doctors) know what you say about ADHD or your child's treatment
  2. We will **NOT** give anyone your name or phone number
  3. We will **NOT** use your name or your child's name in any written notes
  4. We will **NOT** let anyone but the research staff see what we collect from you or your child.
